(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 19 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilmes in view of Stupar, US #3977104.

Wilmes does not particularly teach the sign plate as being orthogonal to or angle with respect to a pipe, when used, however, this is well known in the art. Stupar teaches the sign plate 12 (Figure 2) as being orthogonal to its support. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to place the sign plate at whichever orientation would make it most easily visible.

9. Claims 23 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wilmes in view of Whitehouse et al., US #5428914.

Wilmes does not teach the use of Braille or a cover, however, these are both well known in the art. Whitehouse teaches a sign which may be used with Braille (col. 1 line 65 through col. 2 line 3) and which includes plastic cover 55 (col. 6 lines 20-29). It would have been obvious to one of ordinary skill to use Braille on a sign so that it may be read by the visually impaired. It would have been obvious to utilize a plastic cover on the sign plate of Wilmes to provide protection for the display.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 5307576, 4844000, 3550299, 5170578, 4649658, 5335889, 5732915, 5799916, 2675594, 5311688 and German application 633468 and British specification 1027818 are cited as of interest.
